Describe Proposed Operations (Clearly State all Pertinent Details, and Give Pertinent Dates, Including Estimated Date of Starting any Proposed Work). Use additional page(s) if appropriate.

Drill a medium radius horizontal well in the Red River B fm. Run correlation log at KOP approx. 8480'. A directional survey will be run at 100' intervals to determine BHL of vertical well. Drill curve section with azimuth of 87 deg and land in the top of B zone @ 9123' MD= 8889' TVD with BHL 409' B and 22' N of surf location. Run and cement 7" csg. Drill a 6" horizontal lateral in the B zone to 15142' MD=8889' TVD at BHL 660' FNL & 2640' FWL of Sec. 10. See attached directional drilling plan. Oil base mud will be used to drill the vertical hole and curve section. Fresh water/polymer will be used for the horizontal section. All drilling fluids and cuttings will be contained in a 12 mil lined pit. All liquids will be disposed of in an approved site and the cuttings and liner will be buried in place. Completion will be thru horizontal open hole. Est'd start date is mid-February 2005.

I hereby certify that the foregoing as to any work or operation performed is a true and correct report of such work or operation.
